TECHNOLOGY AND BUSINESS INROADS

“We are happy to inform that our technology and business development are going hand in hand towards our goals of generating two fold revenue and Intellectual Property for the Company. ”

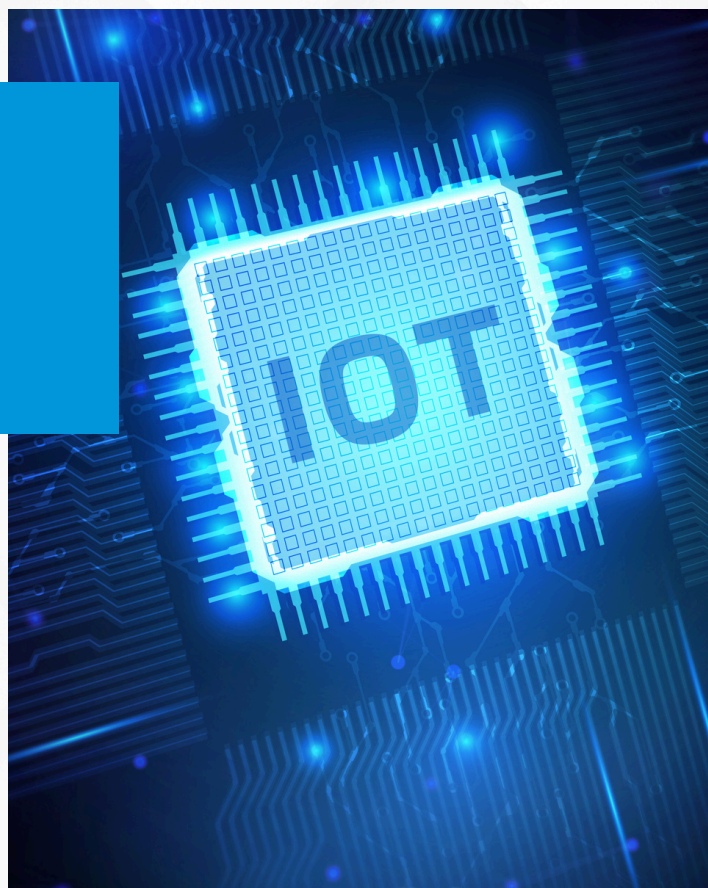

AI PROJECT FOR DEFENCE CONCLUDED

A prestigious one of its kind Made in India software implementation was done for a Defence Organisation using Artificial Intelligence and Neural Network Models. The project is about to Go Live at client site.

NEW IOT SMART PRODUCTS AND PLATFORM HEADING FOR ALPHA TESTING

New IOT Platform with Web Portal for Operations, Support and Analytics and cross platform Mobile Apps for End Users is under development and heading towards Alpha Testing in next couple of weeks. It is anticipated that the product will be launched for Home and Building Automation Segment within 2 months after Beta Testing and Go Live. A plethora of own automation Electronics Sensors and Controllers have been designed and are now undergoing lab testing before final production is initiated.

ACS BAGS A LARGE DEFENCE ORDER FOR IMPLEMENTATION OF CYBERSECURITY

A large order for implementation of Cyber Security for Defence has been received. It complements and supplements our Domain Expertise and Experience in use of latest technologies in AI, Physical/Electronic/Cyber Security and creating large Secure IT Infrastructure.

GETTING SMARTER – MAJOR SMART STREET LIGHTING CONTRACT

ACS enters into Smart Streetlighting systems with a major contract for a government sector – a segment that has potential to generate revenues to the tune of Rs 40 to 50 Crore within next year.

INVESTORS UPDATE

Update on Post-Listing Approval Status

After successfully securing the listing approval, we are now approaching the final stages of completion of the procedural part with regard to credit of shares to the respective shareholders as per the listing approval. We anticipate that it will take a few more days to complete this process. We shall soon approach BSE for announcement of trading date post completion of the same.
